

# Elearning Developer

**LOCATION** Plymouth

---

**SALARY** The role offers a highly competitive basic salary (full time)

**Would you like to work with, and learn from, some of the best Developers within the elearning industry? Would you like to be continually challenged and inspired to learn and grow as you develop your career further with an organisation voted one of England's Most Creative Companies?**

We're looking for an outstanding elearning authoring tool developer, with extensive knowledge of Articulate Storyline and the Adobe Creative Suite.

## What's involved

Working as part of a team, you will be involved in the build of bespoke, animated and interactive elearning products. You will be the glue which brings all aspects of the course together, working closely with the Visual Design and Learning Design teams to create truly engaging products for our clients and learners. Good communication skills and a problem-solving mindset are essential as you will be required to provide solutions to technical challenges, identify risks and ways to mitigate them, as well as deliver products that are functional, robust and of a consistently high-quality.

## You have:

- A degree level of education or equivalent in the digital field
- A strong knowledge of creating elearning content using Articulate Storyline and experience of working with other authoring tools such as Articulate Storyline 360, Adobe Captivate, Lectora or Articulate Rise in a commercial environment
- Confidence using Adobe Creative suite, Illustrator and Photoshop
- Experience in creating content that conforms to SCORM 1.2, SCORM 2004 and xAPI standards
- Other technical skills including MS Office, and a willingness to further your knowledge in areas such as audio/video creation and manipulation, accessibility, HTML5/CSS3/JavaScript, responsive web design and VR

## You're good at

### Being accurate.

Your development of bespoke templates, interactions and games in elearning authoring tools will be to a pixel-perfect level of accuracy.

### Listening and understanding.

You will listen to and understand client requirements in order to amend existing elearning content.

### Problem solving.

In order to detect and resolve issues, you will test content across a range of browsers and devices.

## You like

### Team innovation.

Working closely with other highly skilled professionals, you will regularly innovate and push the boundaries of what is possible.

### Working to a high standard.

You are able to manage and prioritise your workload with confidence and efficiency, ensuring that everything you produce is of an exceptional level of quality.

### Sharing knowledge.

You will support the growth of Junior Developers by sharing your experiences and ideas in open dialogue.

## Why join us?
